

Prunus domestica powder

Cat. No. EXTZ-535

Lot. No. (See product label)

Introduction

Description Prunus domestica powder is a food additive made from fresh Prunus domestica through processes such as drying and pulverizing. Prunus domestica has a sweet taste and is rich in vitamins and minerals, especially vitamin C and fiber. The fruit powder can be used for various purposes, including baking, cooking, making beverages, or as a food additive. It can also be used as a natural colorant to add color to foods. Compared to using fresh fruits, the use of fruit powder offers the advantages of easier storage and transportation.
