Oroxylum indicum seed extract

Cat. No. EXTZ-546

Lot. No. (See product label)

Introduction

Description	Oroxylum indicum seed extract is a water-soluble powder extract product derived from the mature seeds of the Bignoniaceae family plant, Oroxylum indicum. It is produced through a process of heated reflux extraction, vacuum concentration, and spray drying. This process retains the original components of the plant, while resulting in a powder form that has good flow properties and is easily soluble. Flavonoids are the main components of Oroxylum indicum extract, and they exhibit considerable pharmacological activities in various areas, including anti-inflammatory, antimicrobial, and antitumor effects.
