

Purslane Peptide Powder

Cat. No. CAFP-040

Lot. No. (See product label)

Introduction

Description Purslane Peptide Powder is a product extracted by deep processing of Purslane. The main components are protein peptides obtained by enzymatic digestion of proteins in Purslane. These protein peptides are small molecule peptides composed of amino acid chains, with high biological activity and easy absorption. 1. Nutritional supplementation: Rich in amino acids, minerals and vitamins, it can effectively replenish the daily nutritional requirements. 2. Antioxidant effect: Amaranth is rich in natural antioxidant components, such as vitamins C and E, which help scavenge free radicals and slow down the aging process. 3. Immunity boosting: Helps to enhance the function of the immune system by strengthening the body and supplementing nutrients. 4. Improves skin health: Helps maintain skin elasticity and luster, which has a positive effect on skin care. 5. Supports metabolism: Promotes metabolism and helps to improve physical fitness and endurance.

Applications It can be used in various applications, including dietary supplements, functional beverages, and as an ingredient in health-conscious food products.

Product Information

Appearance Off-white powder

Molecular Weight <1000 Da

Usage and Packaging

Package 1kg, 5kg, 10kg aluminum foil vacuum bag; or 20kg, 25kg Fiber Drum

Storage and Shipping Information

Storage Store in a cool, ventilated and dry place, avoid direct sunlight.
