

Peony Oligopeptide Powder

Cat. No. CAFP-042

Lot. No. (See product label)

Introduction

Description Peony Oligopeptide Powder is made from peony flower extract through highly efficient enzymatic processing and is rich in a variety of oligopeptides. Peony is famous for its natural active ingredients. Oligopeptides have good biological activity and can effectively promote nutrient absorption. Peony Oligopeptide Powder has light yellow color and fresh taste, widely used in health supplements and beauty products. Peony Oligopeptide Powder has significant antioxidant and anti-inflammatory effects, which helps to scavenge free radicals in the body and slow down the aging process. The natural plant compounds in its composition can support blood circulation, promote metabolism, improve skin elasticity, and relieve skin inflammation and discomfort. Peony Oligopeptide also enhances the function of the immune system and improves the body's self-healing ability.

Applications Peony Oligopeptide Powder is suitable for use in high-end nutritional supplements and beauty care products. It is especially suitable for consumers who need to improve skin condition and enhance immunity. It can be added into nutritional drinks, facial masks and skin care creams to realize its comprehensive health and beauty effects.
