Creative Enzymes®

Aquaculture intestinal protective agent

Cat. No. PSBT-006

Lot. No. (See product label)

Introduction

Description	Postbiotics can improve the intestinal health level of aquatic animals, regulate the balance of flora, enhance the immunity and anti-stress ability of aquatic animals, enhance the production performance of aquatic animals, improve feed compensation, reduce the incidence of aquatic animals, and have no cross-resistance. BPEL-010 is a postbiotic product developed by patented strains and supporting processes. It focuses on intestinal health care of various aquatic animals and has the effects of antibacterial, intestinal protection, feeding inducement, and growth promotion. Product functions: 1. Broad antibacterial spectrum, no drug resistance. 2. Safe and non-toxic, no drug residue. 3. Adsorb toxins and regulate the intestinal mucosal barrier function. 4. Regulate the balance of intestinal microbial flora and reduce the incidence of aquatic animals.
Applications	Various seawater and freshwater aquaculture
