

Pet postbiotic - intestinal health & immune enhancement

Cat. No. PSBT-008

Lot. No. (See product label)

Introduction

Description This product comes from the fermentation of natural *Lactococcus lactis*, the fermentation product not only retains all the bacteria, a variety of organic acids, amino acids, vitamins and other active substances, unlike other postbiotics, the metabolite contains bacteriocin (composed of 34 amino acids) with strong antibacterial ability. In addition to the functions of general postbiotic elements to promote nutrient absorption and enhance immunity, this product can efficiently inhibit harmful bacteria and reduce inflammation.

Applications It is used as a functional additive in functional foodstuffs, snacks, beverages, nutritional supplements and other dog/cat food and health care products.
