Phenylalanine Ammonia Lyases

Cat. No. ENLZ-001

Lot. No. (See product label)

Introduction

Description	The function of phenylalanine ammonia-lyase is to catalyze the direct deamination of L-phenylalanine to produce trans-cinnamic acid. Our company has developed 10 types of phenylalanine ammonia-lyases, which can be applied to the deamination reactions or reverse reactions of phenylalanine and its derivatives.

Product Information

Form	Enzyme Powder: 10 items*50mg / item, or other quantity
