

Crystallized fructose powder

Cat. No. EXTZ-572

Lot. No. (See product label)

Introduction

Description Crystalline fructose is a monosaccharide and an isomer of glucose. This product is a white crystalline powder, odorless with a sweet taste. It is easily soluble in water and ethanol, with a sweetness level 1.2 to 1.8 times that of sucrose. Crystalline fructose is characterized by its sweetness, high osmotic pressure, anti-caries properties, high solubility, strong moisture retention, and rapid metabolism in the liver.
