

Native Bovine Factor XIa

Cat. No. NATE-0869

Lot. No. (See product label)

Introduction

Description

Bovine Factor XIa is purified from freshly collected Bovine Plasma using a combination of salt precipitations and activation on a negative surface. This Factor XIa is a potent activator of both Human and Bovine Factor IX. Bovine Factor XIa purity is determined by SDS-PAGE and shows complete reduction upon incubation with 2-mercaptoethanol.

Synonyms

Bovine Factor XIa; Factor XIa

Product Information

Species

Bovine

Source

Bovine

Concentration

1.25 mg/ml

Buffer

50 mM Tris/ 0.1M sodium chloride/ pH 8.0-HCl

Storage and Shipping Information

Storage

< -60°C
