Creative Enzymes®

Native Bovine Lysogangliosides

Cat. No. NATE-0870

Lot. No. (See product label)

Introduction

Description	Lyso-gangliosides are prepared by removing glycolipid enzymatically from natural gangliosides. They can be used to analyze various cell function, such as cell proliferation, differentiation, apoptosis, signal transduction, etc. It can also be used as a material of ganglioside derivatives in RI labeling, fluorescence labeling, immobilization since they have free amino group in sphingosine.
Synonyms	Lyso-gangliosides; Lyso-GM3; Lysogangliosides

Product Information

Species	Bovine
Source	Bovine milk ganglioside GM3
Form	Lyophilized
Purity	Greater than 95% by TLC

Storage and Shipping Information

Storage	-20°C
