

Bio-enzyme Pet Deodorising Factor (for washing and care)

Cat. No. NATC-212

Lot. No. (See product label)

Introduction

Description

It is specially formulated for effective odor elimination and health maintenance in your furry companions. This innovative product harnesses the power of natural ingredients and bio-enzymes to provide a safe and effective grooming solution. **Natural Ingredients:** Made from plant-based components, our deodorizing factor is gentle on your pet's skin while being tough on odors. No harsh chemicals or artificial fragrances—just the power of nature to keep your pet fresh and clean. **Odor Elimination & Bacterial Suppression:** The bio-enzymes work synergistically to neutralize unpleasant odors at their source. They effectively break down odor-causing compounds and suppress harmful bacteria, ensuring a clean and hygienic environment for your pet. **Health Maintenance:** Beyond just deodorizing, our formula supports overall pet health. By maintaining a clean and fresh environment, it reduces the risk of skin irritations and infections, promoting your pet's well-being.

Applications

Removes odour from the pet's body surface, improves the quality of the pet's coat and increases the brightness of the coat.
