Creative Enzymes®

Vitamin E Acetate

Cat. No. EXTZ-564

Lot. No. (See product label)

Introduction

Description	Vitamin E acetate is a derivative of fat-soluble vitamin E with antioxidant properties. It is commonly used as an additive in pharmaceuticals, nutritional supplements, and cosmetics. In cosmetics, vitamin E acetate is often used as an antioxidant and skin conditioner, helping to protect the skin from environmental damage and promote skin health. In the food industry, it is used as a nutritional fortifier to supplement the vitamin E content in foods.
