Creative Enzymes®

Zeaxanthin

Cat. No. CEFX-207

Lot. No. (See product label)

Introduction

Description	Zeaxanthin is a natural carotenoid pigment found in various fruits, vegetables, and plants, especially in green leafy vegetables and brightly colored foods like corn, peppers, and oranges. As a potent antioxidant, zeaxanthin is best known for its role in eye health, particularly in supporting macular health and protecting against age-related eye conditions. Zeaxanthin works synergistically with another carotenoid, lutein, to filter blue light and neutralize free radicals, which can help preserve eye function and protect the retina from oxidative damage. It is commonly used in dietary supplements aimed at vision health and in fortified foods.
Applications	Zeaxanthin provides powerful antioxidant benefits and targeted support for eye and skin health, making it a valuable addition to supplements and functional foods focused on healthy aging and wellness.

Product Information

Appearance	Orange powder

Usage and Packaging

Package	1KG/bag

Storage and Shipping Information

Storage	Please keep it in a cool and dry place， protected from light.
