

Pet intestinal protection and immune enhancer

Cat. No. BPEL-018

Lot. No. (See product label)

Introduction

Description

This product consists of complex phage, probiotics, prebiotics, dextran, etc. It precisely targets common pathogenic bacteria in the intestinal tract without affecting other flora. Complex phage: rapid sterilization without causing imbalance of flora. Eliminate common intestinal pathogens: E. coli, Staphylococcus, Salmonella, Clostridium perfringens, Aspergillus, and so on. Probiotics: Supplementation of high-quality live bacteria, regulating intestinal flora. Prebiotics: Supplement the intestinal prebiotics to help beneficial bacteria multiply. Dextran: Protect the intestinal tract, anti-inflammatory and immunity-boosting. Enhance macrophage activity and immunity.

Applications

For intestinal problems such as diarrhea, soft stools, bloody stools, etc. caused by excessive levels of harmful bacteria. Newborn, juvenile, old age, pregnancy and other special life stages with low immunity. Immune deficiency, indigestion, loss of appetite, etc. caused by vaccines, transportation, new environment and other stresses. Viral infections, hospitalization, post-operative and other special periods of recovery .
