Creative Enzymes®

Enzyme Complexes for Ruminant Herbivores

Cat. No. CEFX-171

Lot. No. (See product label)

Introduction

Description	The ruminant-specific complex enzyme is developed by our company based on the digestive physiology of ruminants and the nutritional characteristics of their diet. Formulated by ruminant nutrition experts, it specifically addresses the anti-nutritional factors in the diet of cattle and sheep. This enzyme reduces the impact of heat stress on milk production in dairy cows and significantly increases milk yield.

Product Information

Appearance	Yellowish brown powder
Function	• Improves feed digestibility and utilization, enhances growth rates in meat animals, and reduces feed conversion ratio; • Increases milk production in dairy cows and reduces the impact of heat stress on milk yield; • Enhances immune function in dairy cows, reducing the incidence of mastitis and improving conception rates; • Promotes wool and cashmere growth, improving quality and increasing yield; • Improves concentrate quality and increases product stability.

Usage and Packaging

Package	25KG/Drum with double plastic bag of foodstuff inside

Storage and Shipping Information

Storage	2 years under well storage situation and stored away from direct sun light
