

Probiotics for Herbivores

Cat. No. CEFX-172

Lot. No. (See product label)

Introduction

Description

The product contains a large number of probiotics such as Bacillus and Bifidobacterium. It can improve the gastrointestinal environment of ruminants, inhibit the growth of harmful bacteria, and effectively decompose the crude fiber and other anti-nutritional factors in the feed, release the nutrients, so that they can be fully digested and absorbed, increase the utilisation rate of the feed, and improve the production performance of ruminants.

Product Information

Appearance

Brown powder

Function

- Improve feed utilisation, promote digestion and absorption of nutrients in feed, increase milk production of dairy cows and improve the quality of cow's milk.
- Increase the daily weight gain of meat animals, improve meat quality, and reduce the feed-to-meat ratio.
- Enhance the immune function of ruminants and improve the anti-stress ability of ruminants.
- No pollution, no residue, bio-environmental friendly.

Usage and Packaging

Package

25KG/Drum with double plastic bag of foodstuff inside

Storage and Shipping Information

Storage

2 years under well storage situation and stored away from direct sun light
