Chromium Bisglycinate

Cat. No. CEFX-321

Lot. No. (See product label)

Introduction

Description	Chromium Bisglycinate is a glycine chelated form of chromium supplement that improves its absorption efficiency and bioavailability by combining chromium and two glycine molecules. Chromium is an important trace element for insulin signalling and glucose metabolism.
Applications	Blood Glucose Management For prevention and support in managing type 2 diabetes and metabolic syndrome. Weight Management Dietary supplement commonly used to control appetite and promote fat metabolism. Sports Nutrition Used as an energy metabolism support ingredient to enhance athletic performance.

Product Information

Appearance	Off-white powder

Usage and Packaging

Package	25KG/Drum with double plastic bag of foodstuff inside

Storage and Shipping Information

Storage	2 years under well storage situation and stored away from direct sun light
