Creative Enzymes®

Yeast cell wall (feed grade)

Cat. No. PRBF-015

Lot. No. (See product label)

Introduction

Description	Made from fresh Saccharomyces cerevisiae, it is enriched with high purity MOS and -glucan through highly efficient enzymolysis, wall-breaking and separation. It can absorb pathogenic bacteria and many kinds of fungal toxins and protect animals from vomitoxin, zearalenone and other toxins. Yeast cell wall can enhance animal immunity and improve animal health. By stimulating the immune function, maintaining the micro-ecological balance of the digestive tract, and improving the adaptability of animals to external adverse stimuli, it can improve production performance and economic benefits. Yeast cell wall can make animals more resilient, thus obtaining excellent production performance. Yeast cell wall acts as a natural, green, non-polluting and highly effective immune booster and mycotoxin adsorbent.
Applications	Poultry, Ruminate, Aquaculture, Pig, Pets and special animals

Product Information

Appearance	Light Yellow Powder
Function	Absorb mycotoxins and decrease the restrain of mycotoixin on immunity system Promote the growth of aquatic animals and get down the feed coefficient Improve the hematopoetic function of animals as well as animal shape and fur Accelerate the immunity, milk production and butter-fat percentage of dairy cow.

Usage and Packaging

Package	25kg/bag, Ton bag

Storage and Shipping Information

Storage	Store in a ventilated, cool, dry place for up to 12 months.
