Methylhesperidin

Cat. No. EXTZ-589

Lot. No. (See product label)

Introduction

Description	Methyl Hesperidin is a flavonoid glycoside widely found in citrus fruits and is a mixture of various dihydroflavonoid methyl hesperidins. It has vitamin P-like effects, can enhance the function of vitamin C, and possesses antiviral and antibacterial properties. Methyl Hesperidin also helps maintain the normal permeability of blood vessels, increases the resistance of capillaries, enhances the elasticity and toughness of capillaries, and prevents and treats capillary bleeding.
