

Tuna peptide powder

Cat. No. EXTZ-597

Lot. No. (See product label)

Introduction

Description Tuna peptide powder is a white to milky white powder made by hydrolyzing tuna muscle with complex enzymes, purifying, and spray drying. It has the characteristics of small molecules and easy absorption. Tuna peptide contains substances such as anserine, glutathione, taurine, calcium, zinc and selenium, which can quickly supplement the necessary nutrients for the human body.
