Creative Enzymes®

Tributyrin (feed grade)

Cat. No. CEFX-413

Lot. No. (See product label)

Introduction

Description	Tributyrin (feed grade) is a natural feed additive that can significantly improve the intestinal health, immunity, growth performance and feed conversion rate of animals because it contains butyric acid, which is beneficial to the intestines. It plays an important role in replacing antibiotics, reducing intestinal inflammation, and promoting nutrient absorption. It has been widely used in poultry, pigs, cattle, sheep and other breeding industries.

Product Information

Appearance	powder
Function	It promotes the development of intestinal villus epithelial cells and the repair of damage, and promotes animal growth and development.

Usage and Packaging

Package	25kg/bag, or according to customers' requirements

Storage and Shipping Information

Storage	In a cool, dry place away from direct sunlight
