Fucoidan B Powder

Cat. No. CEFX-415

Lot. No. (See product label)

Introduction

Description	Fucoidan B, also known as fucoidan, is mainly derived from fucoidan. It is a polysaccharide containing fucoidan and sulfate groups. Fucoidan B has anticoagulant, antithrombotic, antiviral, antioxidative, and immune function enhancement functions. Therefore, it is widely used in the modern food industry. Our Fucoidan B is extracted from the natural plant of kelp, and it is a white powder after special extraction processing.
Applications	Used in cosmetics and food additives as raw materials.
Synonyms	Fucoidan B; Brown Algae Extract
