

Deer Antler Freeze-Dried Powder

Cat. No. CEFX-418

Lot. No. (See product label)

Introduction

Description Deer antler refers to the young, soft antlers of the sika deer, typically harvested during the early growth stages before the antlers harden. Deer antler is rich in various bioactive compounds such as amino acids, proteins, lipids, minerals, and hormones. The freeze-dried powder is made by freeze-drying fresh deer antlers to preserve its beneficial properties in a convenient powder form.

Applications Immune Support: The components in deer antler help enhance the immune system, aiding in disease resistance. Anti-aging: Rich in antioxidants, deer antler helps eliminate free radicals and slow the aging process. Kidney and Vitality Boost: In traditional Chinese medicine, deer antler is believed to have kidney-strengthening properties, helping improve physical strength and metabolism. Sexual Health Improvement: Deer antler is thought to stimulate the secretion of sex hormones, commonly used in male health supplements.

Product Information

Species Cervus nippon

Appearance Light Yellow Powder

Usage and Packaging

Package 25kg/bag, or according to customers' requirements

Storage and Shipping Information

Storage In a cool, dry place away from direct sunlight
