Active Astaxanthin Liposome

Cat. No. EXTZ-611

Lot. No. (See product label)

Introduction

Description	Astaxanthin is the natural antioxidant with the strongest antioxidant and anti-aging abilities in nature. Its antioxidant ability is much higher than that of VE and β-carotene. At the same time, it can significantly enhance the mitochondrial activity required for cell reorganization and effectively protect the skin from Damage from UVA, UVB and blue light. Active Astaxanthin Liposome is an active liposome developed using a nano-delivery system. It not only has the characteristics of good stability, not easy to change color, good solubility, and high bioavailability, but also has unique nanobiological effects such as hair follicle targeting and hair follicle storage.
