Creative Enzymes®

Native Human Lysogangliosides

Cat. No. NATE-0888

Lot. No. (See product label)

Introduction

Description	Lyso-gangliosides are prepared by removing glycolipid enzymatically from natural gangliosides. They can be used to analyze various cell function, such as cell proliferation, differentiation, apoptosis, signal transduction, etc. It can also be used as a material of ganglioside derivatives in RI labeling, fluorescence labeling, immobilization since they have free amino group in sphingosine.
Synonyms	Lysogangliosides; Lyso-GM2; Lyso-gangliosides

Product Information

Species	Human
Source	Human brain ganglioside GM2
Form	Lyophilized
Purity	Greater than 95% by TLC

Storage and Shipping Information

Storage	-20°C
