

Bivalirudin

Cat. No. CEPP-014

Lot. No. (See product label)

Introduction

Description Bivalirudin is a synthetic direct thrombin inhibitor used primarily as an anticoagulant. It is commonly used during procedures such as percutaneous coronary interventions (PCI), where blood clots can form due to mechanical interventions in the cardiovascular system. It works by binding directly to thrombin, preventing the conversion of fibrinogen to fibrin, a key step in clot formation.

Product Information

Appearance White or off-white powder

CAS No. 128270-60-0

Molecular Formula C₉₈H₁₃₈N₂₄O₃₃

Molecular Weight 2180.29 g/mol

Usage and Packaging

Package 1G/Bottle, 10G/Bottle, 50G/Bottle or at customers requirement.

Storage and Shipping Information

Storage 2~8°C
