

Carbetocin Acetate

Cat. No. CEPP-016

Lot. No. (See product label)

Introduction

Description

Carbetocin Acetate is a synthetic analog of oxytocin, a hormone that naturally plays a key role in uterine contractions during labor and the postpartum period. Carbetocin is used primarily in obstetric settings to prevent and treat uterine atony (lack of muscle tone in the uterus) following childbirth, reducing the risk of postpartum hemorrhage (PPH).

Product Information

Appearance White or off-white powder

CAS No. 37025-55-1

Molecular

C45H69N11O12S

Formula

Molecular

988.162 g/mol

Weight

Usage and Packaging

Package 1G/Bottle, 10G/Bottle,50G/Bottle or at customers reqirement.

Storage and Shipping Information

Storage 2~8°C

Tel: 1-631-562-8517 1-516-512-3133
