Human Type IV Collagen Powder Non-Sterile

Cat. No. NATC-1803

Lot. No. (See product label)

Introduction

Description	Human Type IV Collagen Powder Non-Sterile is a non-sterile, Type IV collagen powder isolated and purified from human placenta. Commonly found in the extracellular basement membrane separating endothelial and epithelial cells and a component of dermal-epidermal junctions, Type IV collagen.
Applications	This product is typically used as a thin coating for cell culture. This product is also suitable for a wide variety of in vitro applications, such as a substrate scaffold to enhance cell attachment and proliferation. Suitable for many cell types.

Product Information

Source	Human placenta
Appearance	Powder
CAS No.	9007-34-5
Purity	Endotoxin: <=1.0 EU/mL

Usage and Packaging

Package	5mg/ bottle

Storage and Shipping Information

Storage	Storage Conditions: Store at -20C prior to reconstitution then store at 2-10C following reconstitution. Shelf life is a minimum of 6 months from date of receipt if not reconstituted. Shelf life is 3 months following reconstitution.
