

Bovine Blood Powder

Cat. No. CEFX-464

Lot. No. (See product label)

Introduction

Description

Bovine Blood Powder is a high-protein powder made from healthy bovine blood through a drying process. It is rich in hemoglobin, plasma protein, iron, amino acids and bioactive peptides, and has high nutritional value and functional properties.

Applications

Animal feed and aquaculture: As a high-quality protein source, it is widely used in livestock and aquatic feed to provide essential amino acids, promote growth, improve feed conversion rate, and enhance animal immunity. Food and functional nutrition: It can be used as a natural colorant, protein supplement or functional ingredient in food processing, such as meat product color enhancer, sports nutrition and iron supplement food.
