Calf Bone Marrow Powder

Cat. No. CEFX-465

Lot. No. (See product label)

Introduction

Description	Calf Bone Marrow Powder is a powder made from calf bones and marrow that has been specially processed and dehydrated. It is rich in collagen, minerals (such as calcium and phosphorus), amino acids, glycosaminoglycans (such as chondroitin sulfate and hyaluronic acid), and a variety of growth factors and cytokines. Due to the uniqueness of its ingredients, calf bone marrow powder has a variety of health and functional applications.
Applications	Calf bone marrow powder is supplied in powder form and is widely used in dietary supplements, functional foods, sports nutrition products and cosmetics. It has high bioavailability and can effectively promote bone and joint health.
