Isodon Trichocarpus Extract

Cat. No. CEFX-478

Lot. No. (See product label)

Introduction

Description	Isodon Trichocarpus Extract is a natural plant ingredient extracted from the Isodon trichocarpus plant. Isodon trichocarpus belongs to the genus Isodon in the family Lamiaceae and is mainly distributed in China and other parts of Asia. This plant has rich chemical components such as terpenes, flavonoids, volatile oils, etc., and is widely used in traditional medicine and modern health products.
Applications	Isodon trichocarpus extract is widely used in health care products, skin care products and therapeutic products due to its antioxidant, anti-inflammatory, immune enhancement, antibacterial and other effects, especially in the fields of anti-aging, anti-inflammatory, immune support and skin care.
