Bovine Type II Collagen Peptide

Cat. No. EXTZ-663

Lot. No. (See product label)

Introduction

Description	Bovine Type II Collagen Peptide is a collagen peptide derived from bovine cartilage. It is known for its benefits in enhancing skin elasticity, improving joint health, and promoting bone growth. Due to its smaller molecular weight, collagen peptides are more easily absorbed by the body compared to complete collagen, resulting in higher efficacy. Bovine Type II Collagen Peptide is a star product in the fields of health supplements and dietary supplements.
