

Lipase for cheese hydrolysis

Cat. No. NATZ-116

Lot. No. (See product label)

Introduction

Description Cheese Hydrolase is a dedicated enzyme developed by our company specifically for use in cheese

processing applications. It is designed to speed up the maturation of cheese, enhance the aroma, and

improve the solubility of the product, which facilitates further processing and manufacturing.

Product Information

Form Liquid

Activity 100,000U/mL

Optimum pH 7.0-7.5

Optimum

35°C-50°C

temperature
