kelp powder

Cat. No. EXTZ-669

Lot. No. (See product label)

Introduction

Description	Kelp powder is a powder obtained from kelp. It is rich in various nutrients, such as iodine, potassium, magnesium, and other minerals, as well as vitamins C, K, and some B vitamins. These nutrients play important roles in maintaining normal physiological functions in the human body. Kelp powder also contains antioxidants, such as algal polysaccharides and phlorotannins, which can eliminate free radicals in the body, reduce oxidative stress, and help prevent cell damage and delay aging.
