

Coriander leaf extract

Cat. No. EXTZ-685

Lot. No. (See product label)

Introduction

Description

Coriander leaf extract is a natural component derived from the leaves of the Apiaceae plant *Coriandrum sativum* L. It possesses a variety of biological activities and application values. The polyphenolic compounds and flavonoids in coriander leaf extract have antioxidant and anti-inflammatory properties, effectively combating free radicals and slowing down cellular oxidative damage. Coriander leaf extract also has diuretic effects, helping to excrete excess sodium and water from the body while promoting the elimination of heavy metals. The volatile components in coriander leaves, such as decanal, nonanal, and linalool, can influence electroencephalographic activity and saliva secretion, thereby improving negative emotions. Due to its rich bioactive components and multiple health benefits, coriander leaf extract has broad application prospects in the fields of food, medicine, and cosmetics.

Product Information

Source

Coriandrum sativum L.

Form

Powder
