

Tetrahydrobiopterin

Cat. No. NATZ-120

Lot. No. (See product label)

Introduction

Description

Tetrahydrobiopterin is a cofactor of the aromatic amino acid hydroxylases enzymes and also acts as an essential cofactor for all nitric oxide synthase (NOS) isoforms.

Product Information

CAS No. 17528-72-2

Molecular Formula C₉H₁₅N₅O₃

Molecular Weight 241.25

Purity 0.98

Storage and Shipping Information

Storage Keep in dark place, inert atmosphere, store in freezer, under -20°C
