Creative Enzymes®

Soluble Hem-Iron

Cat. No. EXTZ-701

Lot. No. (See product label)

Introduction

Description Women and children are the main consumers of iron supplements, but they often experience gastrointestinal side effects, such as nausea and constipation, when taking inorganic iron supplements. Hem-Iron, extracted from red blood cells, is a mild iron supplement that typically does not cause much digestive discomfort to users. Additionally, unlike inorganic iron, the intake of Hem-Iron is not affected by various ligands in the diet, making it more easily absorbed by the human body.

Product Information

Form It is a black crystalline or amorphous powder with a faint characteristic odor.

Storage and Shipping Information

Storage It is a hygroscopic product that easily absorbs humidity from the air. It should be stored at room temperature not exceeding 25•C in tight containers.
