Liver Hydrolysate

Cat. No. EXTZ-702

Lot. No. (See product label)

Introduction

Description	The liver performs many important functions related to digestion and the gastrointestinal tract, such as the synthesis of bile. Liver hydrolysate is made from the livers of healthy animals through a special process that retains all the essential qualities of the liver. Liver hydrolysate is suitable for use in oral supplements, enhancing liver function and promoting digestion. It can also boost energy and aid in restoring bodily functions.
