Creative Enzymes®

Resistant dextrin

Cat. No. EXTZ-708

Lot. No. (See product label)

Introduction

Description	Resistant dextrin is produced from starch and is a low-calorie glucan that is manufactured by extracting and refining the indigestible components of roasted dextrin using industrial technology. It belongs to the category of low-molecular-weight water-soluble dietary fiber. As a low-calorie soluble food ingredient, it has broad development prospects in the food industry.
