Elderberry powder

Cat. No. EXTZ-710

Lot. No. (See product label)

Introduction

Description	Elderberry powder is a natural food ingredient that combines flavor and health benefits. It is rich in vitamins (such as vitamin C and beta-carotene, a precursor of vitamin A), minerals (including potassium and phosphorus), and dietary fiber. Among these nutrients, vitamin C can help the body maintain normal immune function, while dietary fiber promotes intestinal peristalsis, aids in regulating digestive regularity, and provides natural support for daily nutritional supplementation.
