Creative Enzymes®

Hydroxypropyl Cellulose

Cat. No. EXTZ-748

Lot. No. (See product label)

Introduction

Description	Hydroxypropyl cellulose is derived from cellulose and exhibits thickening, emulsifying, and binding properties. It is widely used in various oral and topical preparations as a coating material, emulsifier, stabilizer, suspending agent, tablet binder, thickener, viscosity-increasing agent, and more. Furthermore, HPC possesses excellent film-forming properties, producing a tough and elastic film that can be used as a tablet film coating.

Product Information

Form	White powder
CAS No.	9004-64-2
