Creative Enzymes®

SYBR Green qPCR Master Mix

Cat. No. NATZ-135

Lot. No. (See product label)

Introduction

Description	Super Hot-Start SYBR Green qPCR Master Mix is a ready-to-use qPCR cocktail. It can be directly used for robust and low-template quantitative PCR with high sensitivity, specificity, and reliability.
Applications	1. Dye-based quantitative PCR detection 2. Nucleic acid amplification and expression profiling 3. Quantitative genotyping studies 4. Genomics-related applications

Product Information

Form	Liquid

Storage and Shipping Information

Storage	Stored at -20°C protecting from light, and is stable for up to 18 months. Avoid repetitive freeze-thaw cycles while using. For immediate use, components may be stored at 2-8°C.
