Creative Enzymes®

Customized deodorizing enzyme preparation for cat litter

Cat. No. EXTZ-763AK

Lot. No. (See product label)

Introduction

Description	This product is a highly effective deodorizing agent formulated with montmorillonite, nano-adsorbent materials, FS composite bio-enzymes, and deodorizing factors. Featuring a unique nano-scale microporous structure, it delivers exceptional physical adsorption capacity for rapid removal of harmful gases. The FS composite bio-enzymes and deodorizing factors effectively block the release of ammonia, hydrogen sulfide, and other harmful gases upon contact with odor molecules from animal urine, feces, or odor sources. This product also achieves the dual purpose of eliminating odors at their source and purifying ambient air by adsorbing, binding, and decomposing harmful gases like ammonia in the environment.
Applications	Manufacturing of alkaline cat litter

Product Information

Form	Powder
