Borodimethylglycine

Cat. No. EXTZ-770

Lot. No. (See product label)

Introduction

Description	Borodimethylglycine is an organic compound containing boron, primarily used in agriculture, nutritional supplementation, and bone health. It functions by regulating calcium metabolism, promoting plant growth, or aiding the human body in absorbing minerals.
Applications	Boron-supplemented food additives.

Product Information

Appearance	White crystalline powder, non-hygroscopic.
CAS No.	77356-05-9
Molecular Formula	C3H10BNO2
Purity	99%
