Creative Enzymes®

Liposomal Coenzyme Q10

Cat. No. EXTZ-776

Lot. No. (See product label)

Introduction

Description	Liposome technology is a biomimetic delivery system that simulates the cell membrane. It utilizes the compatibility of phospholipid bilayers to achieve efficient delivery.We use non-GMO sunflower lecithin to ensure higher safety of raw materials. The powder has uniform quality, better solubility and more consistent particle size distribution. Liposomal Coenzyme Q10 offers the following advantages: Excellent biocompatibility Able to encapsulate both water-soluble drugs and lipid-soluble ingredients High bioavailability

Product Information

Form	Powder
CAS No.	303-98-0
Purity	0.7
