Creative Enzymes®

(S)-Equol

Cat. No. EXTZ-777

Lot. No. (See product label)

Introduction

Description	Equol is an isoflavonoid compound and an estrogenic metabolite of daidzein. It not only exhibits mild phytoestrogenic activity, but also demonstrates excellent antioxidant, anti-inflammatory and collagen-protective properties. This "one ingredient, multiple functions" characteristic allows it to gain market presence in both menopausal health management and anti-aging skincare. This product is synthetic (S)-equol with high purity, suitable for the development of functional health products and daily chemical products.
