Zinc Picolinate

Cat. No. EXTZ-780

Lot. No. (See product label)

Introduction

Description	Zinc Picolinate is a chelated organic zinc compound formed by zinc ions and picolinic acid. It is one of the most bioavailable forms of zinc supplements currently available, with multiple functions including zinc supplementation, antioxidant activity and immune regulation. It is widely used in nutrition, pharmaceuticals, feed and other fields, and can also be used in the development of anti-aging and skincare products.

Product Information

Form	White or almost white crystalline powder
CAS No.	17949-65-4
Molecular Formula	C12H8N2O4Zn
Purity	0.99
