L-5-MTHF-Ca

Cat. No. EXTZ-782

Lot. No. (See product label)

Introduction

Description	Calcium L-5-methyltetrahydrofolate (L-5-MTHF-Ca) is the primary form of folate present in human plasma and the active metabolite of folic acid in the body. Compared with conventional folic acid, it exhibits higher bioavailability and a broader range of physiological effects. This product is manufactured using a full enzymatic catalysis synthesis technology, resulting in high purity, being green and pollution-free, and free of any chiral isomers. It is a safe and efficient folate supplement.

Product Information

Form	White powder
CAS No.	151533-22-1
Molecular Formula	C20H23CaN7O6
Molecular Weight	497.53
Purity	0.98
