

Antifoam

Cat. No. EXTZ-649

Lot. No. (See product label)

Introduction

Description

Our antifoam is a food-safe defoamer based on polydimethylsiloxane. The formula complies with the Food and Drug Administration (FDA) of the United States and the food contact regulations of the European Union, ensuring the safety of its use during the processing of the food products for consumption. This product can be used in the fermentation process of food ingredients, in the production of beverages, and in food processing tanks.

Applications

It is used in fermentation processes in the brewing industry and in food processing.
