

Naringenin

Cat. No. EXTM-003

Lot. No. (See product label)

Introduction

Description

Naringenin is a natural plant compound belonging to the flavonoid family. It is primarily found in the peel of citrus fruits such as pomelos and can also be extracted from pomelo peel. Exhibits potent antioxidant, anti-inflammatory, and metabolic-regulating properties. Widely used in nutraceuticals, functional foods, cosmetic formulations, and pharmaceutical research.

Applications

Healthcare

Product Information

Appearance

Light yellow powder

CAS No.

480-41-1

Molecular Formula

C₁₅H₁₂O₅

Molecular Weight

272.25

Purity

98%
